

Farvelæg billeder

der starter med ...

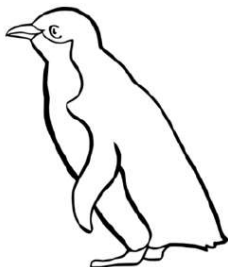

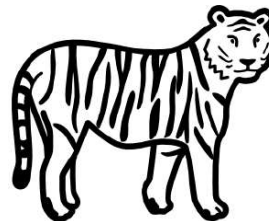

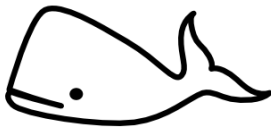

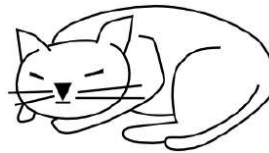

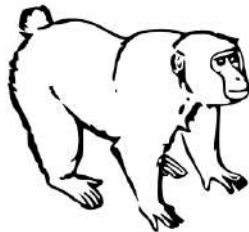

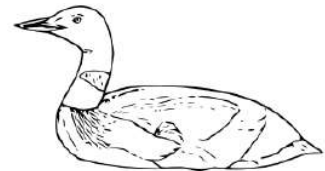

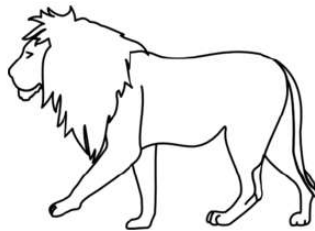

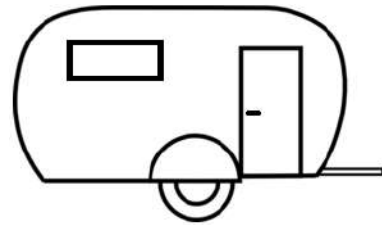

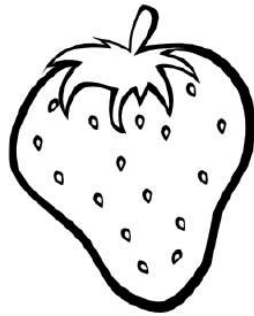

Navn: _____

Klasse: _____

Farv billederne

Har du lagt mærke til alle de smukke farver, der er omkring dig?
Farver gør verden mere levende og spændende, og de kan hjælpe dig
med at se forskel på ting.

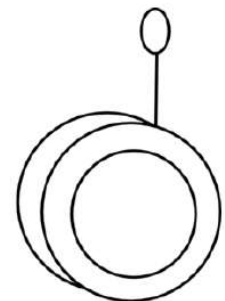

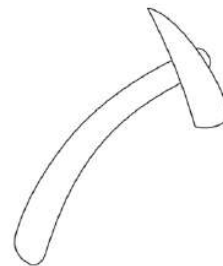

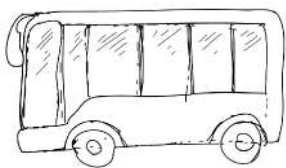

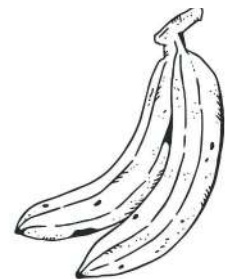

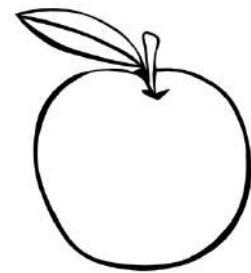

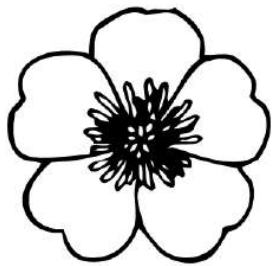

Farv de billeder, der starter med A.

Farv billederne

Du kan selv være med til at sætte kulør på verden. I hvertfald kan du farvelægge de billeder, der er i dette hæfte.

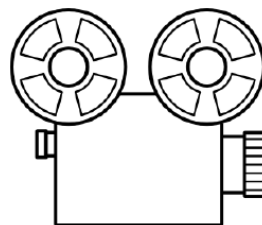

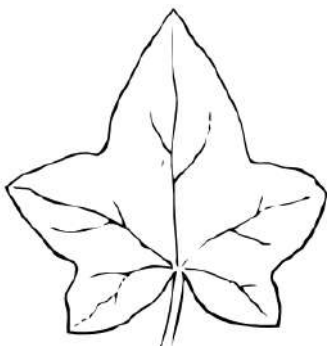

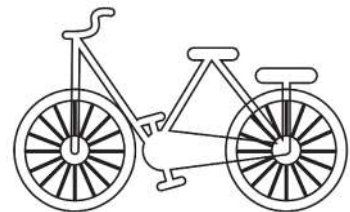

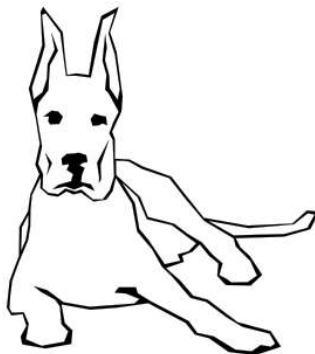

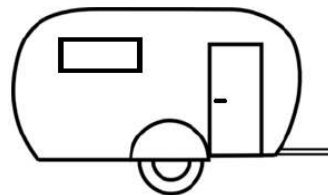

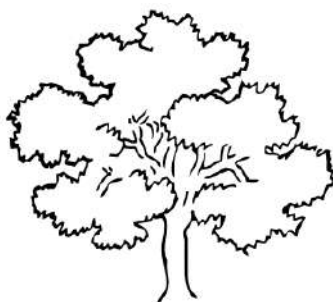

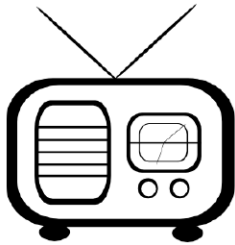

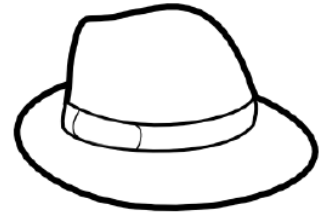

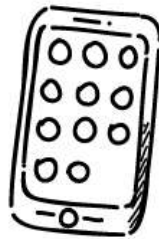

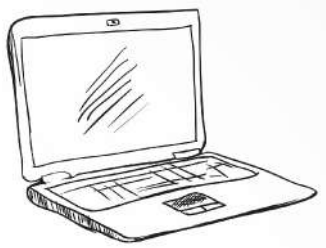

Farv de billeder, der starter med B.

Farv billederne

Men hvad er farver egentlig? Måske har du hørt nogen sige, at farver er lys? Hvis der ikke var noget lys, ville der heller ikke være nogen farver.

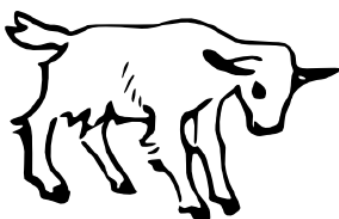

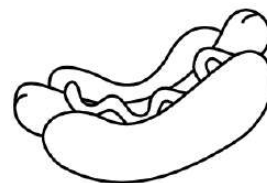

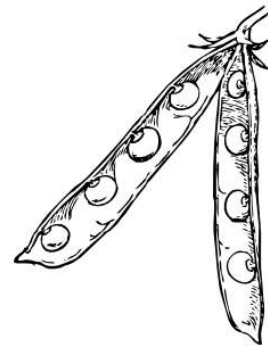

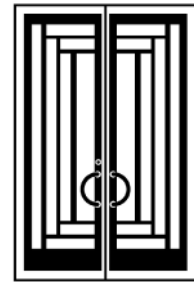

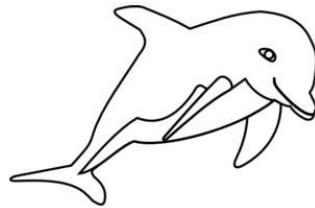

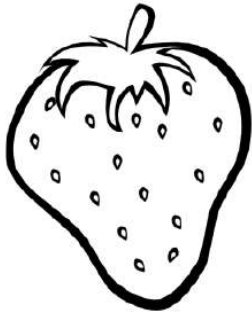

Farv de billeder, der starter med C.

Farv billederne

Hvilke farver du ser, afhænger af lyset. Man kan dog tale om farver på to måder - nemlig farvet lys og så de farver, som du maler med.

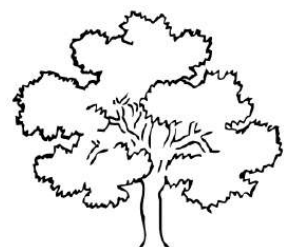

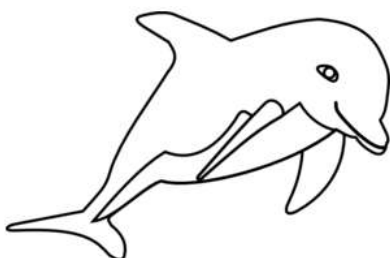

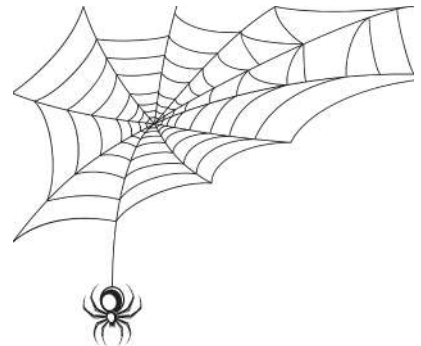

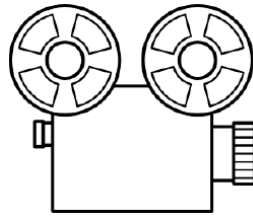

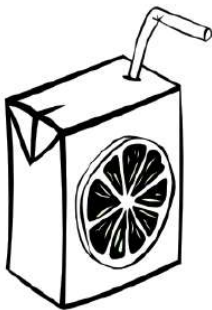

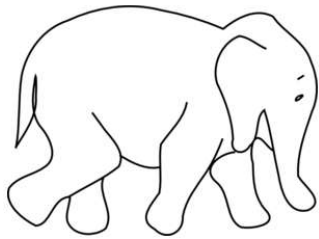

Farv de billeder, der starter med D .

Farv billederne

Når vi taler om farver som lys, er det f.eks. regnbuer og solnedgange.
Lys består af alle farver i regnbuen, og når det rammer noget, sker
der noget helt fantastisk!

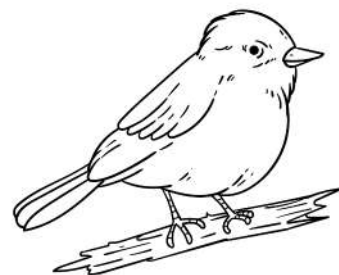

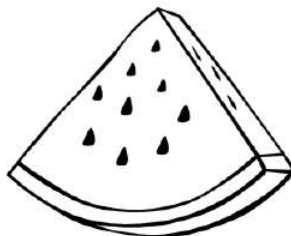

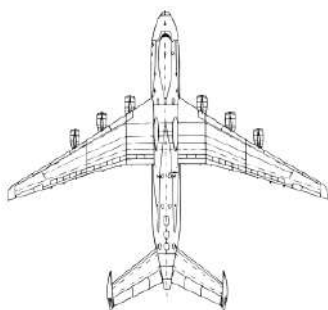

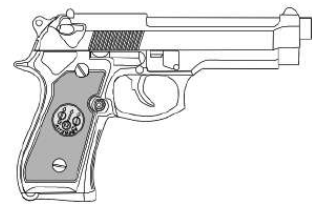

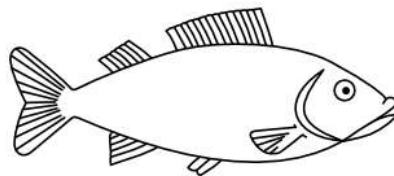

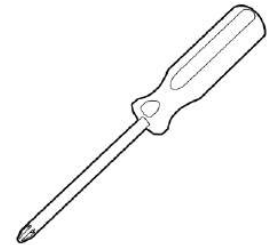

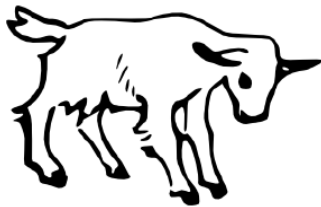

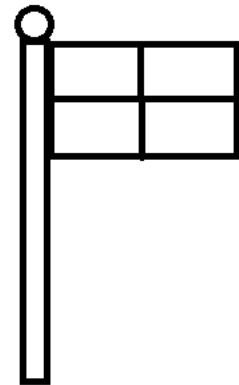

Farv de billeder, der starter med E.

Farv billederne

Når lys rammer et glas vand eller et farverigt tæppe, bliver lyset splittet. Så ser vi regnbuens skønne farver: rød, orange, gul, grøn, blå, indigo og violet!

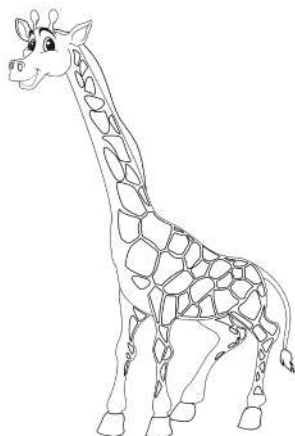

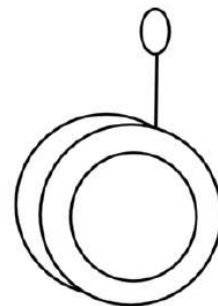

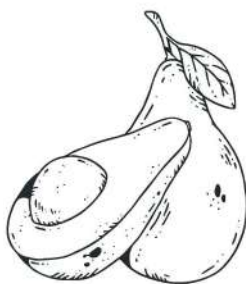

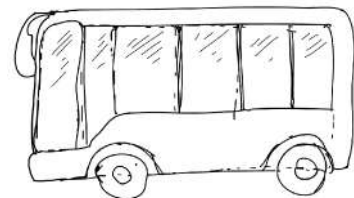

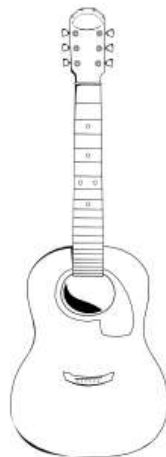

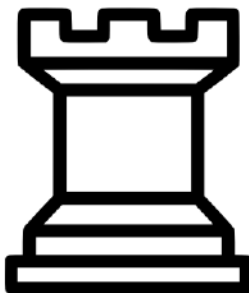

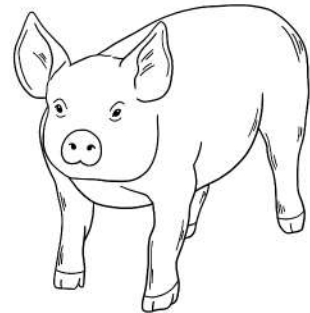

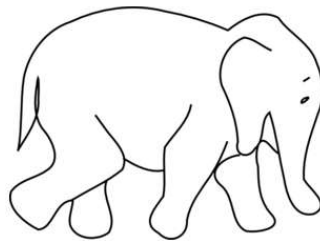

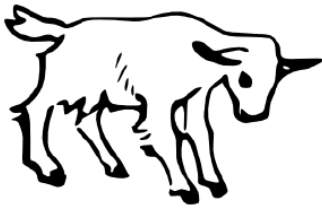

Farv de billeder, der starter med F .

Farv billederne

Regnbuen er som en farverig bro på himlen. Regnbuer opstår, når lys og regn mødes. Det er regndråberne, der får lyset til at splitte sig.

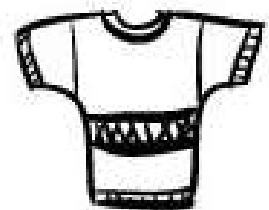

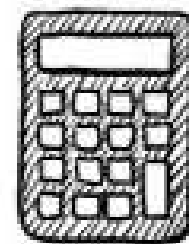

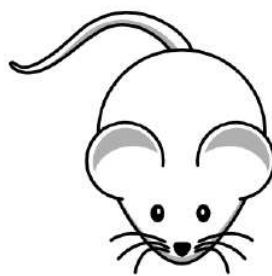

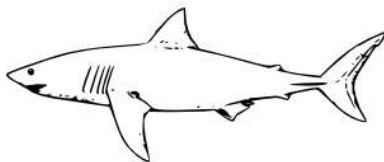

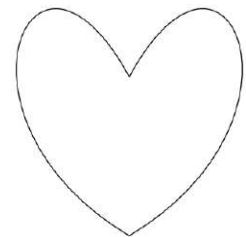

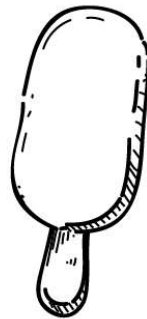

Farv de billeder, der starter med G .

Farv billederne

Når du ser farver på en computerskærm eller et TV, er det også farvet lys, du ser. Den måde, farverne blander sig på din skærm, er helt anderledes, end den måde du kan blande farver med maling.

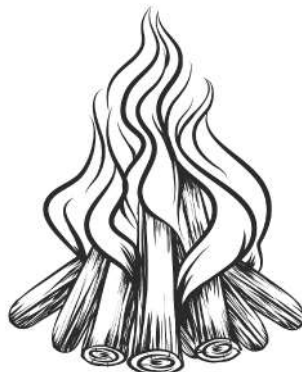

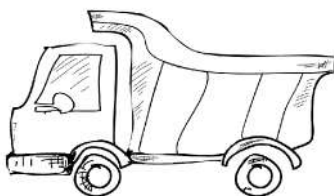

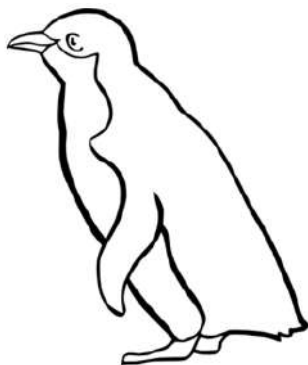

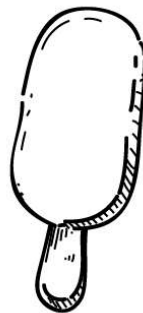

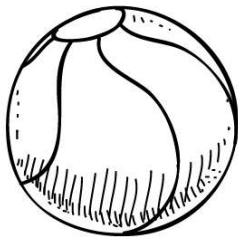

Farv de billeder, der starter med H.

Farv billederne

Hvis du maler et billede med farveblyanter eller maling, bruger du små farvede dele, der blandes sammen.

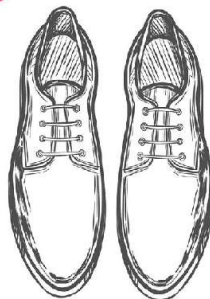

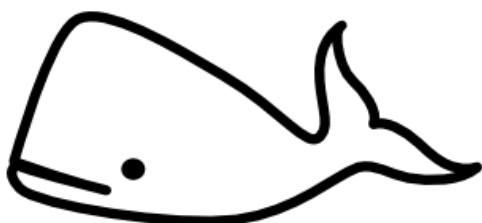

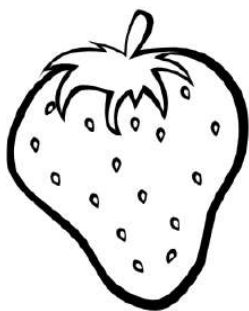

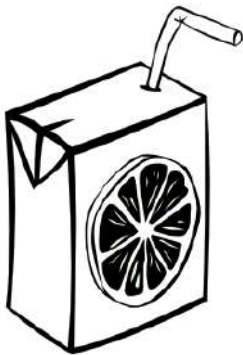

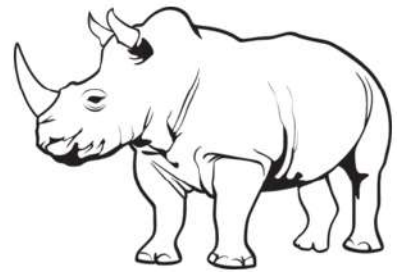

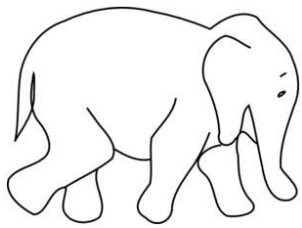

Farv de billeder, der starter med I .

Farv billederne

Der er tre særlige farver, som kaldes primærfarver. Det er rød, blå og gul. Alle andre farver kan skabes ved at blande disse tre.

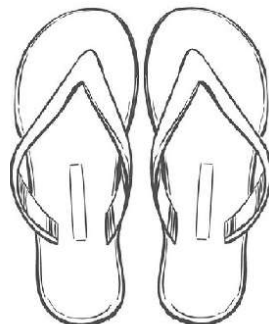

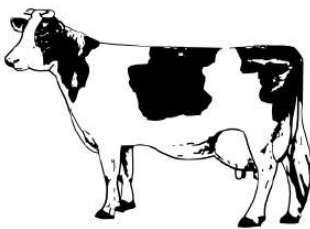

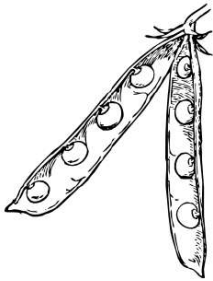

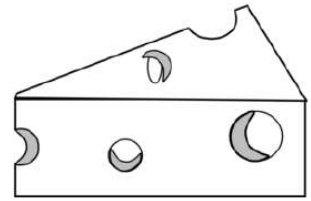

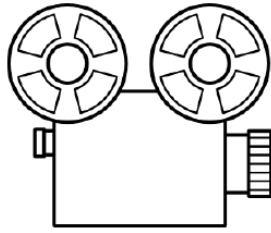

Farv de billeder, der starter med J.

Farv billederne

Blander du rød og gul maling, bliver det til orange. Blandes gul og blå, får du grøn, mens blå og rød maling bliver til lilla. Det er næsten som trylleri.

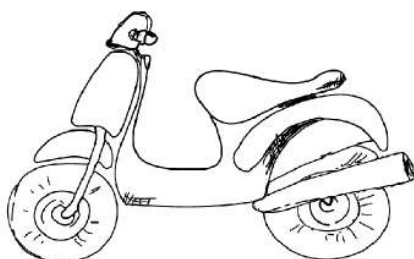

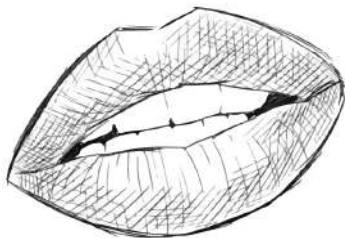

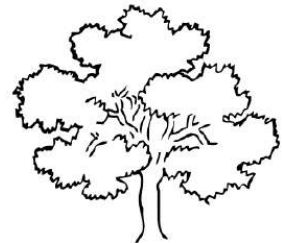

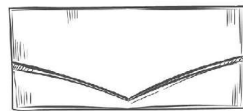

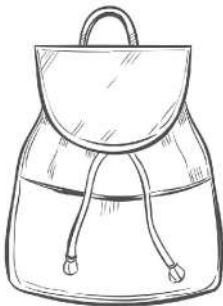

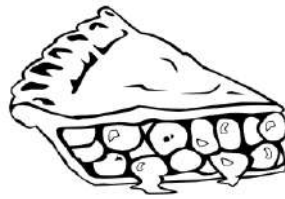

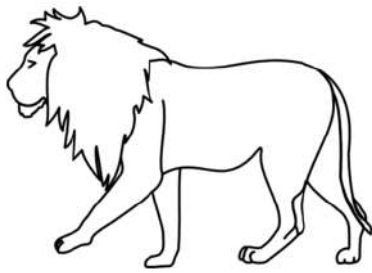

Farv de billeder, der starter med K .

Farv billederne

Det sjove er, at farver som lys og farver som maling ikke opfører sig ens. Det er som om, farverne har to hemmelige identiteter! De blander sig nemlig på forskellige måder.

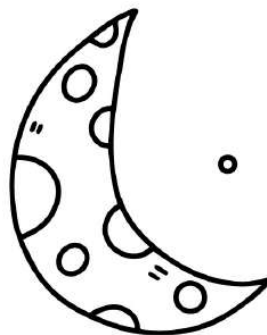

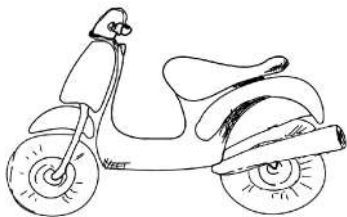

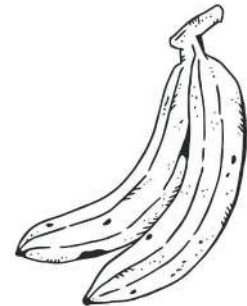

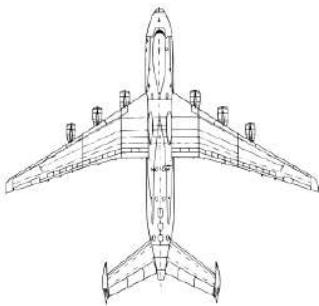

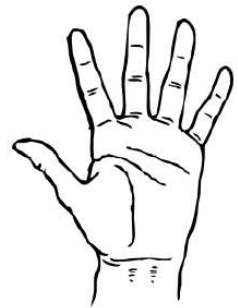

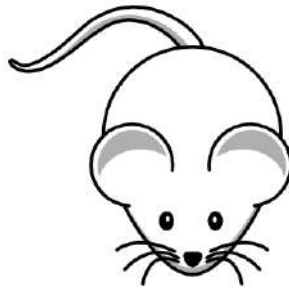

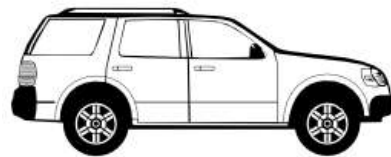

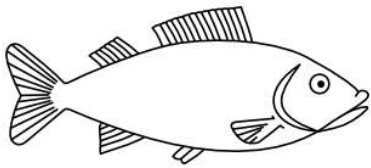

Farv de billeder, der starter med L.

Farv billederne

Hvis du blander alle farver af maling sammen, bliver det til grå. Men hvis du blander alle farver af lys, får du hvidt lys. Er det ikke sjovt?

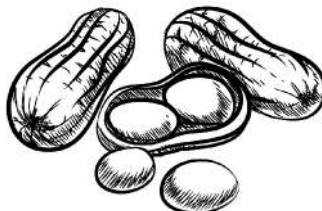

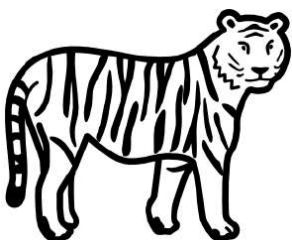

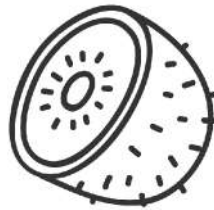

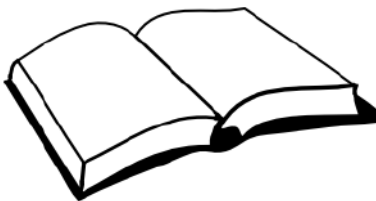

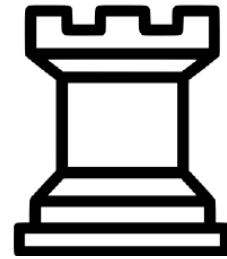

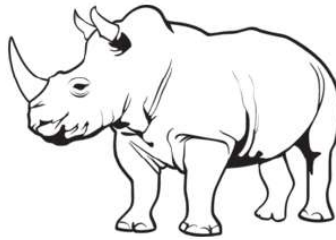

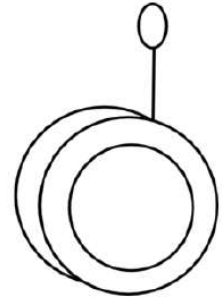

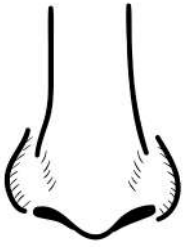

Farv de billeder, der starter med M .

Farv billederne

Man kan beskrive farver på forskellige måder. For eksempel kan man sige, at de er mørke eller lyse.

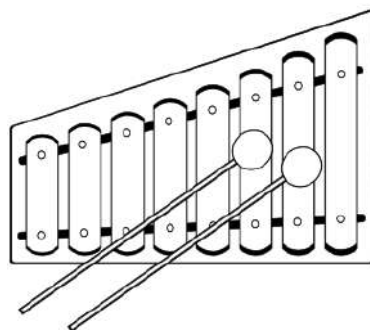

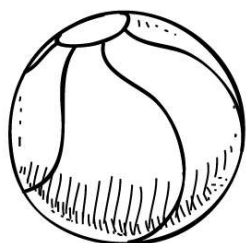

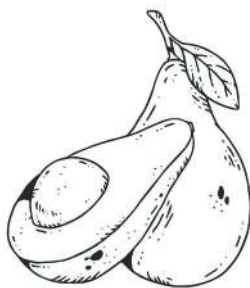

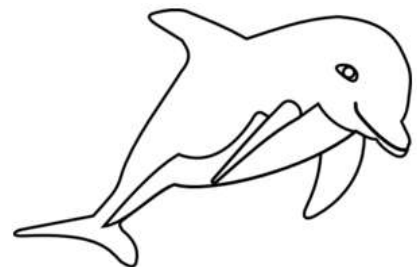

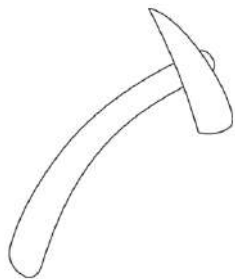

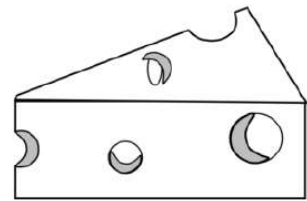

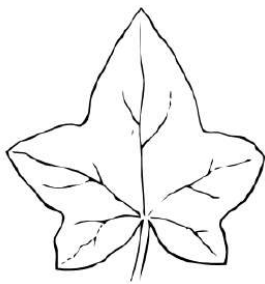

Farv de billeder, der starter med N.

Farv billederne

Farver kan også deles op i varme og kolde farver. Rød, orange og gul er varme farver, der får os til at tænke på solen og varme dage.

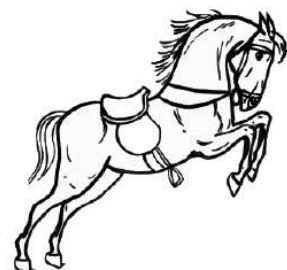

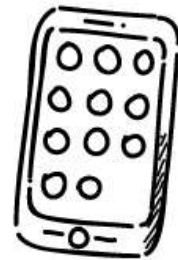

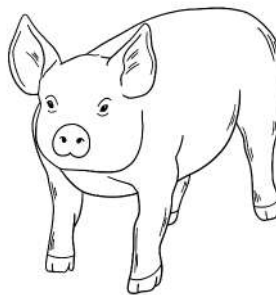

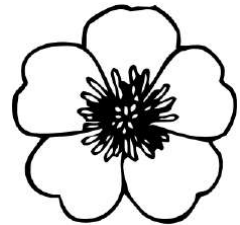

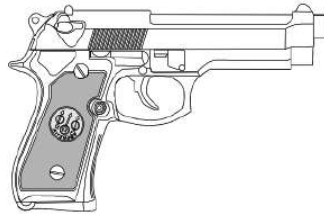

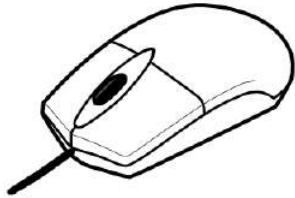

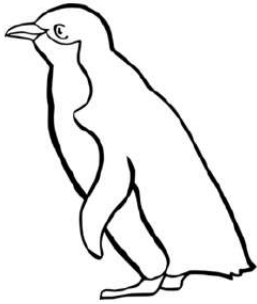

Farv de billeder, der starter med O.

Farv billederne

Blå, grøn og lilla er kolde farver, der minder os om is og kølige nætter. Farver kan få os til at tænke på forskellige ting.

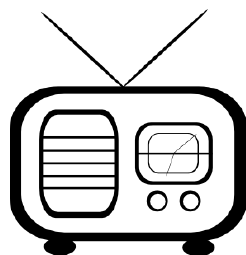

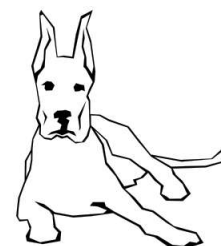

Farv de billeder, der starter med P.

Farv billederne

Farver er ikke kun en del af vores synsoplevelse, de påvirker også vores følelser, stemninger og opfattelse af verden omkring os.

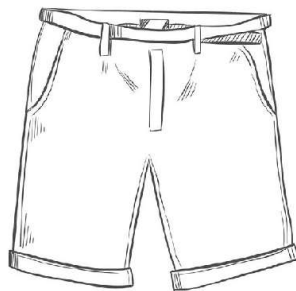

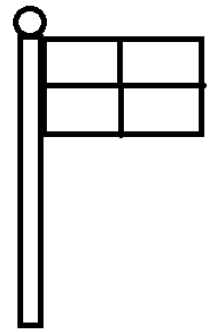

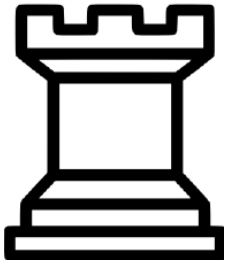

Farv de billeder, der starter med R.

Farv billederne

Måske har du prøvet at have solbriller med farvet glas på? Er glasset blåt, ser du dine omgivelser i kølige farver. Er det brunt, virker det som om, solen skinner.

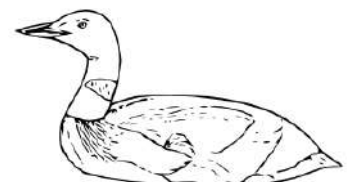

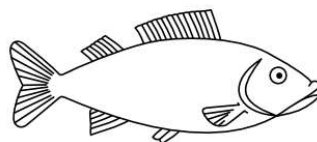

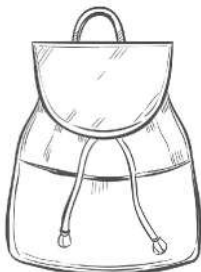

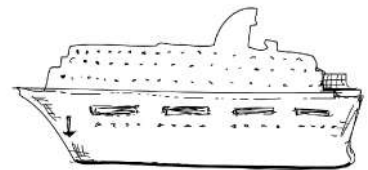

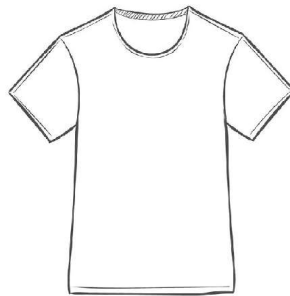

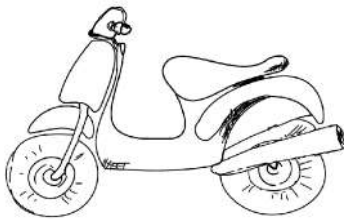

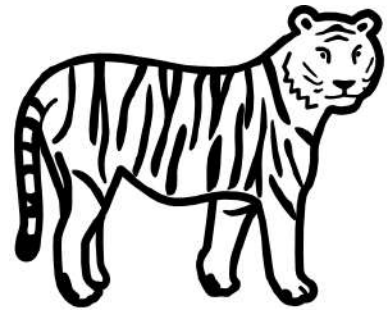

Farv de billeder, der starter med S.

Farv billederne

Farver er ikke kun smukke, de har også symboler og betydninger. De kan være som små hemmelige beskeder, der fortæller os noget vigtigt.

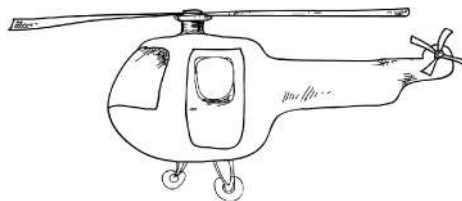

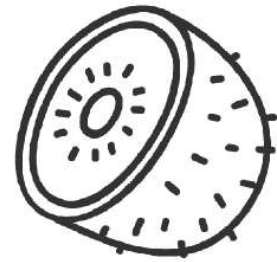

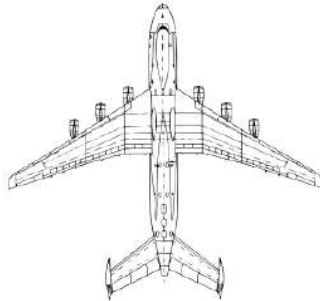

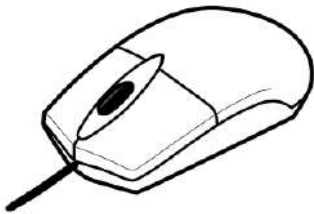

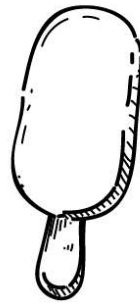

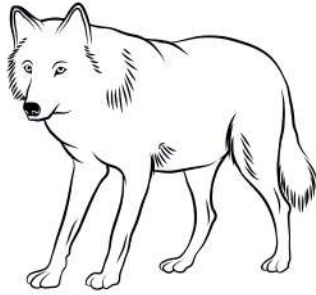

Farv de billeder, der starter med T.

Farv billederne

Rød er farven for kærlighed! Hjerter, roser og julemandens dragt er alle røde og symboliserer kærlighed og glæde.

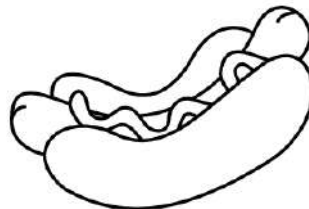

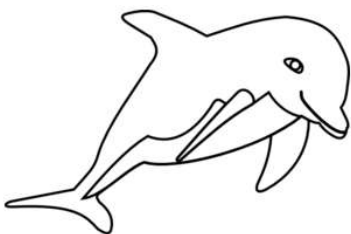

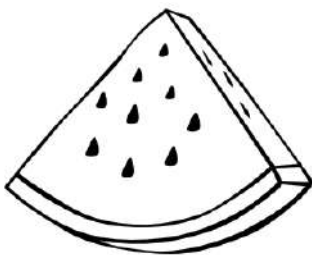

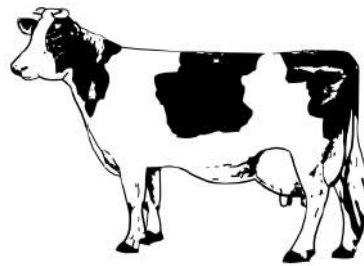

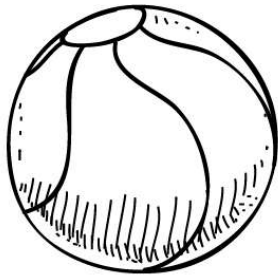

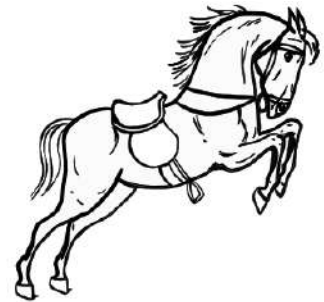

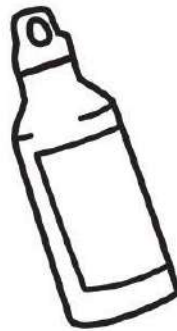

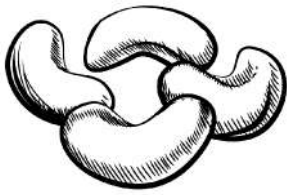

Farv de billeder, der starter med U.

Farv billederne

Blå symboliserer ro og fred. Farven minder os om himlen på klar solskinsdag, hvor alt er godt. Søen og himlen er blå for at vise os, at vi skal være rolige og glade.

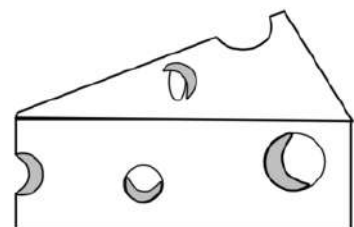

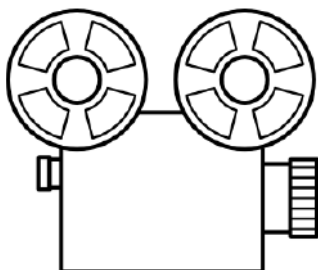

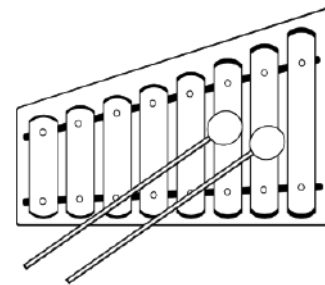

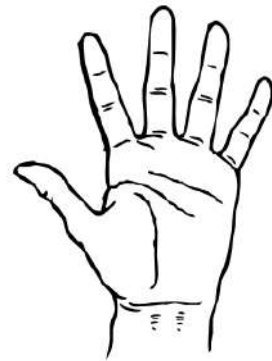

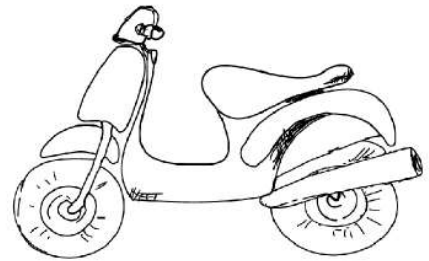

Farv de billeder, der starter med V.

Farv billederne

Grøn står for natur. Tænk på træer, græs og planter. De er alle grønne og symboliserer naturens skønhed. Den grønne farver hvisker til os, at naturen er vores ven, og at vi skal passe på den.

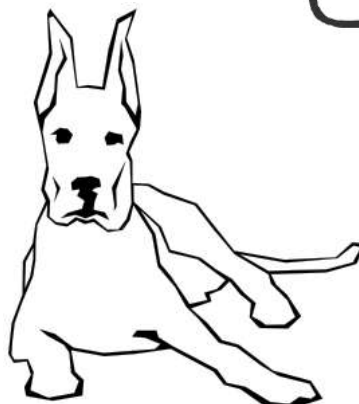

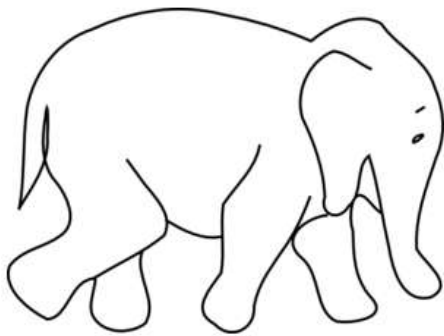

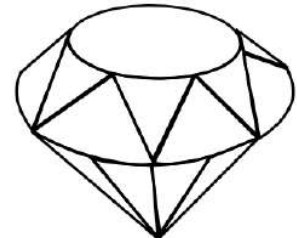

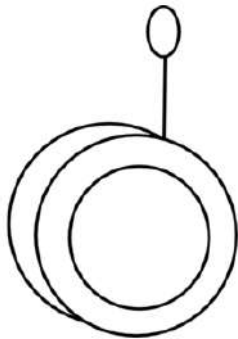

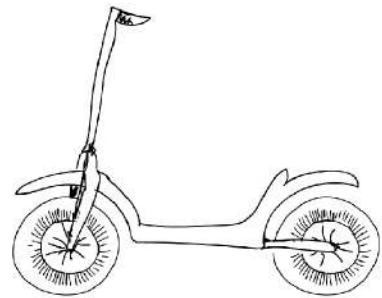

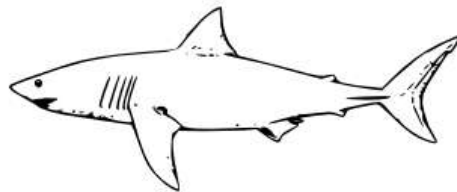

Farv de billeder, der starter med X.

Farv billederne

Gul og orange kan få tankerne hen på solskin, solsikker og lyse dage. Når solen skinner bliver vi glade.

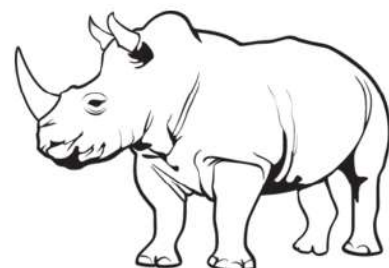

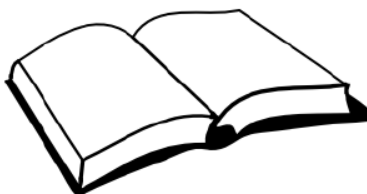

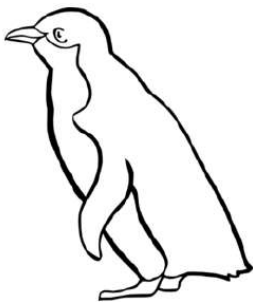

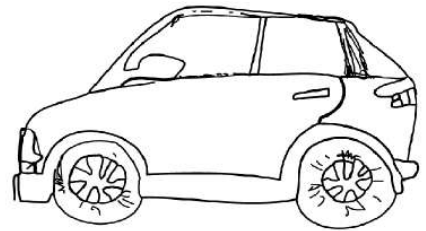

Farv de billeder, der starter med Y.

Farv billederne

Sort og hvid er modsætninger, men de har brug for hinanden for at skabe balance. Sort symboliserer ofte mysterier og dybde, mens hvid repræsenterer renhed og lys. En zebra er både sort og hvid.

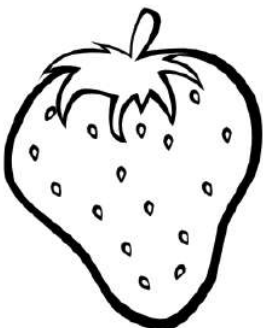

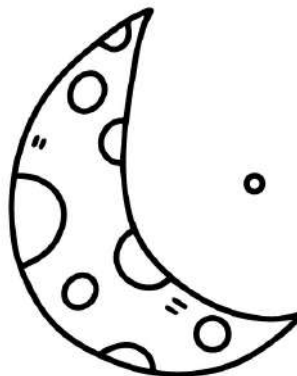

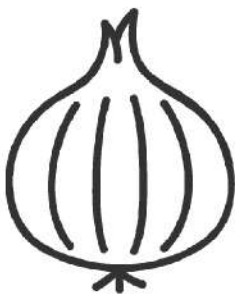

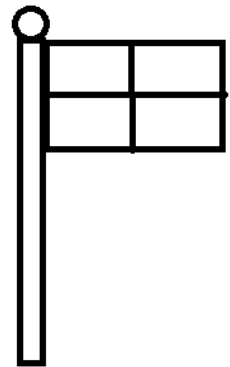

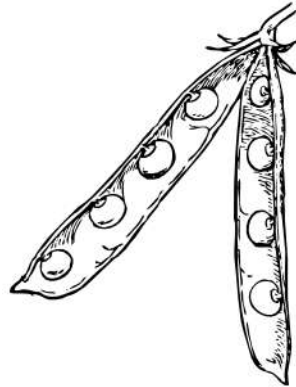

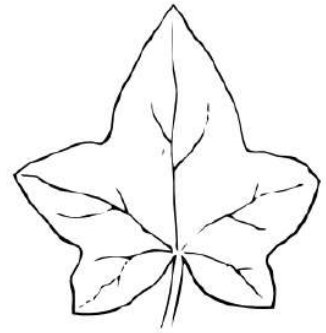

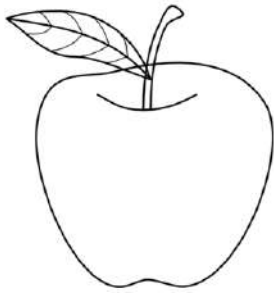

Farv de billeder, der starter med Z.

Farv billederne

Farver er som små fortællere, der gemmer på hemmeligheder og følelser. De er som magiske ord, der taler til vores hjerter og tanker.

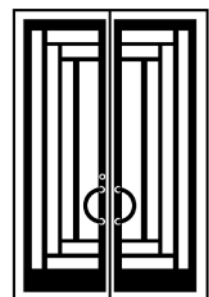

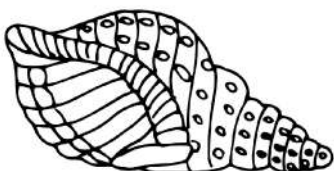

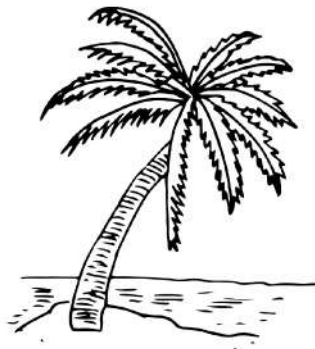

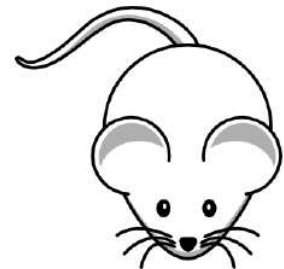

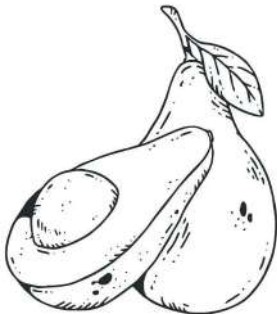

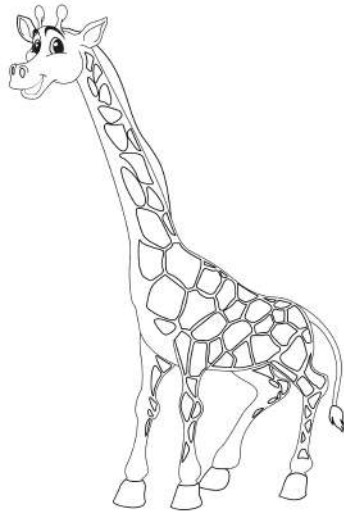

Farv de billeder, der starter med Æ.

Farv billederne

Næste gang du ser en regnbue eller en solnedgang, eller når du maler et billede med dine farveblyanter, så husk, hvor fantastiske farver er.

Farv de billeder, der starter med Ø.

Farv billederne

Farver er som magi. De fortæller os historier og skaber en visuel symfoni, der gør vores verden rig og mangfoldig.

Farv de billeder, der starter med Å.
